HAIR REMOVAL

Sugaring - Sugaring is a completely natural hair removal technique using a paste made from sugar, lemon and water that has been used for centuries in Middle Eastern societies. Unlike waxing, there is no heat involved, the paste is pulled away from the skin in the direction of the hair growth so it is less painful and causes less trauma to the hair follicle. The hair only needs to be 2mm long and the regrowth appears slowly, softly and finely. A great exfoliating skin treatment ideal for sensitive skins.

Waxing - Extreme care is always taken with all of our waxing services. We use a high quality hot and strip wax incorporating Tea Tree and Lavender for its excellent soothing, calming and healing properties. Arbré wax is very gentle on the skin and excellent for sensitive areas.
